Sure, why don't you set something up for early next week? I've attached the tet DER I prepared for the last submission. Most of it will probably be useful to copy for yours. I think the hard part about this one is going to be the large geographic area involved so we will have to strategize on that.

Cassie

Subject: Oxitec chat

Hey Cassie!

Hope you're feeling better today. I'm sure you have plenty to catch up on since you've been out, but I was wondering if you'd be up for a quick chat about Oxitec stuff sometime this week or next (there doesn't seem to be any rush here since the comment period just opened up). I'm working on the DER for their environmental tetracycline study and I was hoping to ask you about your approach when you worked on this for their last EUP. Any help is really appreciated!

Thanks!
Nina
